

Cork Harbour at night – aboard Holy Grounder with Eddie English

SailCork will run a number of evening sessions in the **autumn/winter** 19:30-22:30. These evenings are designed for those with an interest in navigation and the understanding of lights, buoys and shipping at night.

Cork Harbour is ablaze with lights at night and there are 2 lighthouses, 11 lit piers and jettys and over 30 buoys to look at! It is a great evening out - being on the Harbour and seeing all the lights gives you a very special feeling!

Perfect for those who want to see what the Harbour is like at night or those studying for Day Skipper exams – there is a big section on lights in the General Assessment Paper and the Yachtmasters course has a special exam on Lights, Shapes and Buoys under the IRPCS.

Top it off with a great sail, some hot drinks and a snack and you will want to come back again!

Next evening - call SailCork **021 4811237**
